Breakfast Sets

No Home is now Complete without a Cozy Breakfast Nook

If there is one time of the day more than another when we need cheerful, attractive surroundings, it is the usually hurried breakfast hour. Things can be so right or so wrong.

And how much it helps to eat breakfast in a cozy, informal nook or corner, with dainty dishes, colorful cloth and charming furniture!

Nowadays no home is complete without a breakfast nook. It may be a small, separate room, an adjoining alcove or just a corner of the kitchen. But it is there in some form—and rightly so.

Every woman who has one knows how much work it saves; so many steps, so many motions, but aside from the saving it makes, the nook, attractively furnished with floor, walls and curtains in keeping, has an irresistible appeal—so cozy

and so inviting that it becomes a favored place, not for breakfast only but for other meals as well.

Hoosier Equipment as pictured in this folder easily solves your problem of an attractive breakfast nook. In each piece the artistic ability of one of Grand Rapids' most famous designers is easily recognized. There is a grace of line and a beauty of color and design in all pieces, which make an instant appeal.

The Hoosier name is your guarantee of satisfaction. While all pieces are moderately priced there is a quality not to be excelled even in the most expensive furniture. The materials used by Hoosier are first grade. All table tops are five ply. The hand-rubbed lacquer finish is not only beautiful but durable as well.

No. 725 Drop-Leaf Table (Open 37x42 inches; closed 37x23 inches) replaces No. 726, now discontinued.

Hoosier Breakfast Room Furniture

See the illustrations on the inside of this folder.
